EDUCATION

Bachelors of Science in Computer Science   September 2021 – May 2025

New Jersey Institute Of Technology   GPA: 3.4/4.0 | Newark, NJ

Relevant Coursework: Data Structures and Algorithms, Database System Design & Management, Intro to Data Science, Intensive Programming in Linux, Principles of Operating Systems, Programming Language Concepts

SKILLS

Languages: Java, Python , HTML5/CSS, C/C++, JavaScript, C#, Bash, SQL
Framework: Unity, BOOTSTRAP
Developer Tools: Git, GitHub, Linux, APIs, VS Code, IntelliJ
Programs: Microsoft Office 365, Active Directory, Help Desk
Soft Skills: Communication, Problem-Solving, Teamwork, Analysis and Research, Innovation, Customer Service

PROJECTS

Space Satellite Coordinator (Python)   September 2023 – November 2023
                                                                                                          Newark, NJ

- **Lead a team of four** to create a real-time web app using Python and **Streamlit API**
- Displays data on the 10 nearest overhead satellites based on user input coordinates
- **Integrated N2YO API** to automate latitude and longitude input, simplifying satellite tracking
- **Integrated ChatGPT API** for user inquiries, enhancing the interactive experience
- Designed a space-themed interface with clickable planet names for unique ChatGPT responses
- Secured first place in the Streamlit API Category at GirlHack Hackathon, showcasing **technical skills and teamwork**

Programming Language Interpreter (C++)   February 2023 – April 2023
                                                                                                          Newark, NJ

- Interpreter consists of three main components: a lexical analyzer, a recursive decent parser, and an evaluator
- A lexical analyzer reads a text file and breaks it down into tokens; a keyword, an identifier, or a number
- Recursive decent parser uses the tokens to determine if the text file is syntactically correct

Personal Website (HTML/CSS/JavaScript)   February 2023 – April 2023
                                                                                                          Newark, NJ

- Created multiple pages with a functional contact me page that had enter-able text fields, education, and professional experience
- Used HMTL, BOOTSTRAP 5, and external CSS files for the navigation bar, cards, and overall website layout and format
- Used **Git** to push project to **GitHub** and broadcasted on **GitHub Pages**

EXPERIENCE

IT Intern   April 2022 – Present

Wiss & Company, LLP   Florham Park, NJ

- Resolved **50+** help desk tickets monthly promptly and efficiently within a team
- Trained new colleagues in company policies and IT security practices; Managed user accounts in **Active Directory** and **applied licenses**
- Assembled and configured **100+ workstations**, including software setup
- Conducted data backup, transfer, and scrubbing for employee records; Streamlined IT asset tracking and inventory management

Lift Operator   September 2021 – March 2023

Big Snow   East Rutherford, NJ

- Collaborating with a team; Maintaining a safe work area, i.e., adjusting ramp heights, storing tools, fencing set-up, etc
- **Interacted with over 100 guests** daily, delivering exceptional **customer service** and enhancing their overall experience
- Maintained continuous oversight of lift operations, promptly identifying and reporting any issues or unusual conditions
